# On-Line ISO Code Particle Monitor

Get fast and accurate ISO cleanliness code readings from your hydraulic and lube oils in real time with the PM-1 Particle Monitor.

hyprofiltration.com/PM1

## PM-1 Specifications

The device is calibrated to ISO 11943. It calculates and displays results according to ISO 4405-09, A&A 54059, NAS 1638 und GOST 17216.  Portaction Class  Flow Rate  Flow Rate  So-400 ml/min (required for operation)  Fluid  Onnection  Electric  Connection  Data Memory  On-board 4MB storage capacity  Fluid  Compatibility  Mineral oils, phosphate esters and specified synthetics (Skydrol by special option only). Not for use with water glycol or other water based fluids. Water levels above saturation in any fluids will cause the PM-1 to malfunction.  Temperature Range  Interface  Ordering Information  PM-1 PMRSUP-50 PM-1 Petruical Monitor  PM-1-PWRSUP-50 PM-1 electrical power supply for portable use (120V AC, 1P, 50 Hz to 24 V dc)  PM-1-PWRSUP-50 PM-1-PWRSUP-50 PM-1-PWRSUP-50 Power supply (60 Hz) and PM-1-DAT data/power adapter.  PM-1-BR PM-1-PWRSUP-50 PM-1-PWRSUP-50 PM-1-PWRSUP-50 Power supply (60 Hz) and PM-1-DAT data/power adapter.  PM-1-BR PM-1-PWRSUP-50 PM-1-PWRSUP-					
Operating Pressure  Protection Class  Flow Rate  50-400 ml/min (required for operation)  Fluid Connection  Electric Connection  Data Memory  On-board 4MB storage capacity  Fluid Compatibility  Mineral oils, phosphate esters and specified synthetics (Skydrol by special option only). Not for use with water glycol or other water based fluids. Water levels above saturation in any fluids will cause the PM-1 to malfunction.  Temperature Range  Fluid  Mineral oils, phosphate esters and specified synthetics (Skydrol by special option only). Not for use with water glycol or other water based fluids. Water levels above saturation in any fluids will cause the PM-1 to malfunction.  Temperature Range  Fluid  Mineral oils, phosphate esters and specified synthetics (Skydrol by special option only). Not for use with water glycol or other water based fluids. Water levels above saturation in any fluids will cause the PM-1 to malfunction.  Temperature Range  Fluid  Mineral oils, phosphate esters and specified synthetics (Skydrol by special option only). Not for use with water glycol or other water based fluids. Water levels above saturation in any fluids will cause the PM-1 to malfunction.  Temperature Range  Fluid  Mineral oils, phosphate esters and specified synthetics (Skydrol by special option only). Not for use with water glycol or other water glycol (-20°C to 80°C)  Fluid  Fluid  Respective to the pressure levels application adapters, outlet line flow control attachment, PM-1-PWRSUP-50 power supply (50 Hz) and PM-1-DAT data/power adapter. #### Eliminate the guesswork.

Dedicating PM-1 to hydraulic and lube systems can eliminate the need for bottle sampling and let's you know how clean your oil is at all times. PM-1 can be integrated into operating software for constant monitoring and can also be set up to trigger alarms if a system gets too dirty, giving you complete control of your fluids and your systems.

#### Unmistakably easy.

As the PM-1 analyzes your fluids, the on-screen counts update in real time to show you the ISO cleanliness codes for the  $4\mu,\,6\mu,\,14\mu$  and  $21\mu$  channels in incredible clear and easy to read figures.

### Perfectly integrated.

Add the PM-1 to almost any Hy-Pro Filtration System with Special Option code "O" (where applicable) to get real time ISO Codes integrated directly on your filtration and always know exactly how clean your hydraulic and lube oils are.
